Information based on

Impact surveys and impact case studies on reporting on Te Niwha-funded research projects

Leading research impact areas

% of projects on pathway for future impact

SOCIAL IMPACT Increased knowledge in science

HEALTH & WELLBEING IMPACT

Improved population health and health status for disadvantaged groups (79%)

VISION MĀTAURANGA

Hauora/Oranga: improved health and social wellbeing (87%)

HEALTH & WELLBEING IMPACT

-Early detection and mitigation of health risks (62%) -Better understanding of the environment, and characterisation and management of natural capital (62%)

SOCIAL IMPACT

(75%)

-Understanding of and resilience to real or perceived communal risk (62%) -Stronger social and infrastructure systems and improved techniques for delivery of public services (62%)

> Track transmission dynamics, evolution, and prevalence of avian viruses in New Zealand

Detect a wide range of bacteria, protozoa, viruses and fungi of potential health concern through wasterwater

Ensure vaccines are delivered in a method that is safe and effective for all body types

Will provide a set of quantitative scenarios for potential future pandemic threats to support pandemic preparedness, planning and real-time decision making

EXAMPLES OF RESEARCH IMPACT

PUBLICATIONS TO DATE

(6 month before completion of projects)

Deliver improved community health and health status for remote regions & disadvantaged populations

High performing ID surveillance systems will contribute to multiple health, social, equity and economic benefits

Respond more quickly to future serious health outbreaks, including pandemics, by enabling rapid on-site monitoring of disease transmission
